

Project Design Phase-I Solution Architecture

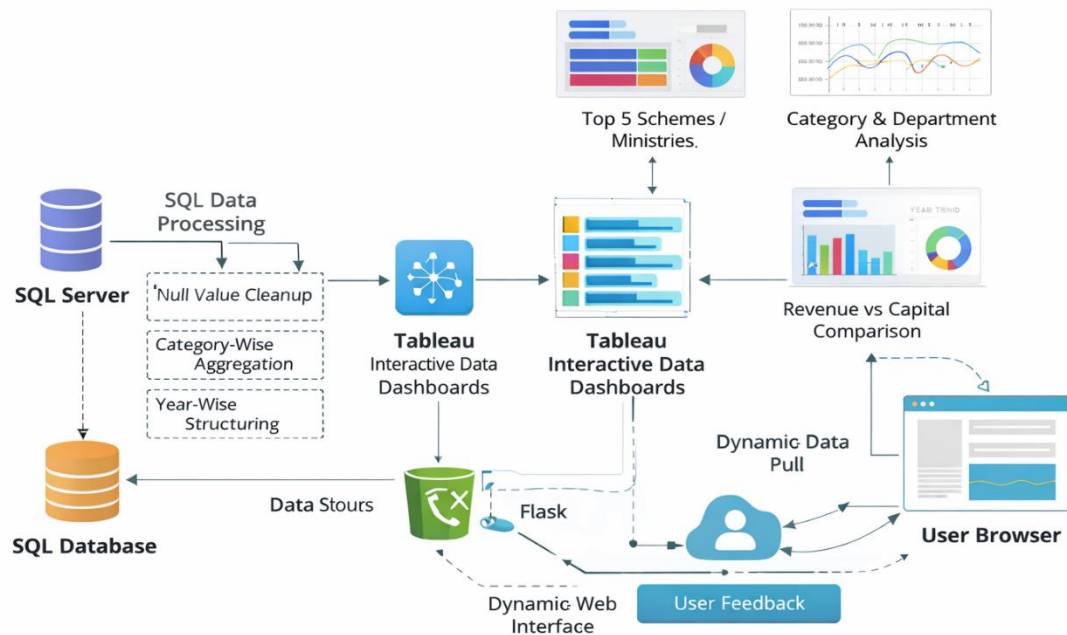

Date	3 February 2026
Team ID	LTVIP2026TMIDS24962
Project Name	Empowering India: analysing the evolution of union budget allocations for sustainable growth
Maximum Marks	5 Marks

Solution Architecture:

Solution architecture is a complex process – with many sub-processes – that bridges the gap between business problems and technology solutions. Its goals are to:

- Find the best tech solution to solve existing business problems.
- Describe the structure, characteristics, behavior, and other aspects of the software to project stakeholders.
- Define features, development phases, and solution requirements.
- Provide specifications according to which the solution is defined, managed, and delivered.

Example - Solution Architecture Diagram:

Architecture and data flow for the Union Budget Dashboard Project
